(PLEASE PRINT ALL INFORMATION)

DATE: 11/11/68

# OFFICIAL

1. Diamond | D<sup>™</sup> is a U.S. patented (45,983,238) gemstone identification, tracking and recovery system that provides a computer networked system that captures, stores and retrieves information that links and cross-references laser inscribed, certified diamonds and gemstones with their owner.

The Diamond ID<sup>SM</sup> program provides you with the complete assurance that if your diamond is ever lost or stolen, the information contained in our database can be quickly accessed by police and the insurance company to aid them in their search and recovery efforts.

Further, because of the specific and unique link between the diamond owner and the purchased diamond, Diamond I.D.™ will replace your Diamond I.D.™ registered jewelry in the event of theft, loss and mysterious disappearance within two (2) years of purchase.
